

About Safety&Access

Safety & Access are one of the UK's leading training and H&S consultancy providers; offering a wide range of professional support services to a broad range of industry sectors.

Accidents, incidents and near misses at work cost industry millions of pounds every year and in some cases can jeopardise businesses and livelihoods. Our mission is to improve safe working by developing and delivering high quality services that are tailored to meet the needs of our customers to ensure practical safe working solutions and to comply with current regulations and legislation.

The requirements of the Health & Safety at Work Act require all employers to provide and maintain a safe working environment, safe systems of work and to provide sufficient training to ensure the health and safety at work of employees and others who may be affected.

We support businesses and individuals where a requirement for working safely forms a critical part of their operations – covering a wide range of sectors which spans construction, utilities, process industries, retail, media, primary and secondary health care and the public sector. Our support services help to ensure that workers are properly trained, that their installations are properly monitored and inspected and that businesses receive the best possible practical advice and solutions to ensure a safe working environment.

2010 Programme now available.
